

# Low-Profile MatTop Conveyor

## Committed to Quality Conveyor

Image Modified to Feature Low-Profile MatTop Conveyor

Nercon's [low-profile mattop conveyors](#) has a reduced frame height, making it ideal for applications where space is limited, such as in tight factory layouts or when integrating with existing equipment without significant modifications. The mattop chain surface provides a stable platform for products to be transported. Additionally, the flat surface ensures smooth and consistent movement of products, preventing slipping or jamming. Low-profile mattop conveyors combine space-saving characteristics with reliable and efficient material handling, making them a good fit for industries where maximizing floor space and maintaining a streamlined workflow is essential.

### FEATURES

- Space-saving
- Easy integration
- Flexibility and scalability
- Easy maintenance
- Versatile applications

### INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Pet Food & Supplies
- Cheese & Dairy
- Meat & Poultry
- Produce
- Beverage
- Confectionery & Candy
- Frozen Foods
- Health & Beauty
- Household Cleaning Products
- Pharmaceuticals

### APPLICATION TYPES

- Bottles
- Boxes
- Bundles
- Cans
- Cartons
- Cases
- Jars
- Pouches
- Tapered Cups <sup>®</sup>

## Versatility as a Hand-pack Station

Nercon's semi-automatic conveyor hand-pack station utilizes a foot device that controls the flow of packed products and makes sure every person is continually fed with work. The system is designed so each person packs directly on the low-profile mattop conveyor system, taking the product from the upper in-feed conveyor, and filling packed work on a takeaway conveyor. Packing stations must also be ergonomic, "operator-centric" and comfortable for each person to use.

In today's fast-paced manufacturing landscape, optimizing efficiency and productivity are paramount goals for manufacturers. Incorporating a conveyor hand-pack station into the production line can revolutionize the workflow, enhance productivity, reduce errors, and improve overall operational efficiency. Our technical conveyor designers have decades of experience and can help specify the ideal packing station, meeting the requirements of the product and batch sizes.
