

Vertical Conveying Solutions

Completely modular, the [gripper elevator](#) allows for line modifications such as shortening, extending, raising or lowering. Available in an "S" or "C" configuration, the gripper elevator firmly, yet gently, grips product to securely elevate or lower it and does so using a minimal floor space footprint. Products travel in line with continuous transport through the elevation change and seamlessly discharge onto the take-away conveyor.

FEATURES

- Hand crank located on either side and can make quick width adjustments
- Height can also be adjusted
- Simplicity in design makes re-configuration easy
- Fits within existing conveyor lines with ease due to its minimal footprint design

INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Beverage
- Confectionery & Candy
- Dairy Food
- Health & Beauty

APPLICATION TYPES

- Bottles
- Cans
- Cartons
- Cases
- Jars
- PET
- Pucks

Gripper S-Flow Design

S-Flow conveyors pick up items from an infeed conveyor and carry them (90° vertically) up or down to either a higher or lower output elevation. They then deliver the products to a discharge conveyor.

Gripper C-Flow Design

C-Flow conveyors pick up items from an infeed conveyor, change product orientation from right side up to upside down, and deliver them to a discharge conveyor.

Gripper Upender Design

Gripper upender design alters the product placement by 90°. Gripper upender conveyor collects items from an in-feed conveyor, transports them to a higher or lower level elevation, and releases them for a discharge conveyor.
