

Production Efficiency

Nercon's hand packing stations are designed to reduce safety concerns and improve the efficiency of packaging lines that utilize manual labor for case or carton, pick and place packing processes. Our hand pack stations align both the case and product in an optimum position for ergonomic safety of the operators, reducing over reaching, awkward twisting, strenuous bending and excessive lifting.

FEATURES

- Manual, Pneumatic or Hydraulic lift to change platform elevation suitable for packers
- Adjustable foot rests
- Pivoting platforms for easy access and cleaning
- Food-safe options offer individual inspection prior to packaging

INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Beverage
- Confectionery & Candy
- Dairy Food
- Frozen Foods
- Health & Beauty
- Pharmaceuticals

APPLICATION TYPES

- Bottles
- Cans
- Cartons
- Jars
- PET
- Pouches
- Trays

Unique Design

Nercon's hand pack stations increase production efficiencies on packaging lines that incorporate labor-intensive manual tasks. Our consistent flow of product input is at a comfortable pace, which allows packers to quickly pick and place product in containers without having product back-ups or products tipping over. Once a case or carton is filled, the operator pushes the filled container directly onto to a conveyor carrying the container down the production line, or places the filled container into a larger case for mass quantity shipping.
