

## Committed to Quality Conveyor

Nercon's [MatTop conveyors](#) are a versatile conveying system that provides maximum flexibility and reliability for applications requiring gentle and smooth conveying. Our modular plastic belt conveyors are constructed of corrosion resistant plastic modules and designed for both wet and dry applications. The sprocket-driven thermoplastic belts ensure positive tracking while providing trouble-free performance in transporting products within minimum floor space. Ideal for large or small packaging applications, MatTop conveyors provide long life, high impact resistance, layout flexibility, and quick and easy maintenance.

### FEATURES

- Design flexibility, ease of layout
- Efficient and gentle handling
- Low noise level
- Low maintenance requirements
- Fixed or variable speed options

### INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Beverage
- Confectionery & Candy
- Dairy Food
- Produce
- Health & Beauty

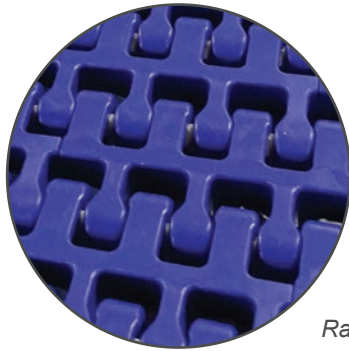

### APPLICATION TYPES

- Bottles
- Cans
- Cartons
- Cases
- Glass
- Pouches
- Pucks
- Trays

Nercon's MatTop conveyor system offers a standard conveyor design, which represents our most economical solution. Utilizing Nercon's proven, established components and designs ensures the fastest delivery schedule and reliable

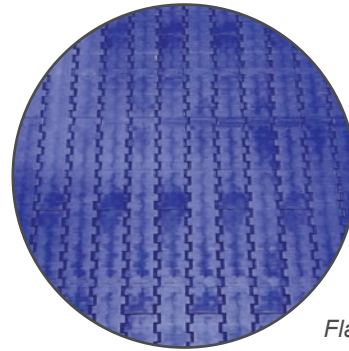

performance. Features, enhancements and options give additional flexibility to meet a variety of product handling needs. Curves, straights, metering, incline and decline conveyor design options are available.

## MatTop Chain Types

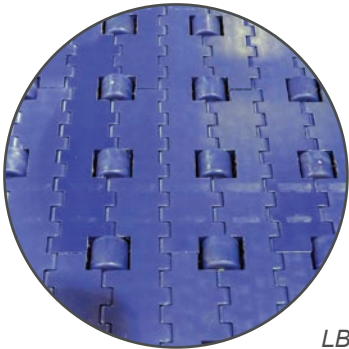

*Radius Flush Grid*

- Designed for easy conveying in curved applications
- Can operate in both straight and radius applications
- Used for applications where drainage and airflow is desired

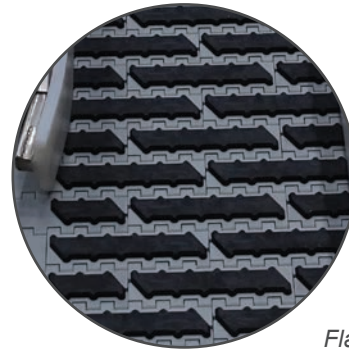

*Flat Top*

- Easy to clean
- Suitable for a wide range of products, especially when a fully closed belt surface is preferred

*LBP Roller Top*

- Ideal for smaller case, material and package handling applications and accumulation

*Flat Friction Top*

- Commonly used on incline or decline conveyors, where the elevation of the product changes
