

Safety and Efficiency

Performing equipment change-outs, gaining safe access to hard-to-reach areas, and reducing steps with a walk-through passage on the production floor, are all solutions provided by Nercon's [retractable conveyor](#). The retractable conveyor can be manually opened up to 60", and can be operated while the conveyors are running.

FEATURES

- Reduce pinch points
- Passage for fork trucks, carts and personnel
- Eliminates lifting of heavy gate
- Optimal use of manufacturing space

INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Beverage
- Confectionery & Candy
- Dairy Food
- Produce
- Health & Beauty

APPLICATION TYPES

- Bottles
- Cans
- Cartons
- Cases
- Pouches
- Pucks
- Trays

Retractable Conveyor

Changing out equipment on a production line can have challenges when equipment isn't the same size and there is a gap between equipment. It can also be a costly downtime issue to "rebuild" the line and make sure everything lines up with a smooth transition. Nercon's retractable conveyor

solves this with a simple crank of the handle. No rebuilding of the line for equipment change-outs. The retractable conveyor opens or closes to smoothly join the line with the process equipment.
